

Hey dad

10-28-21

Thought I would send the few fights I have now, along with records from the sheriff department regarding access to data stored in the PUMA 5. Since being asked I have thought about that idea.

It is alot like your computer, and whether anyone could tekll which microchip was the troubles to your need to reboot all the time. Not all computer acts alike. Nor does every microsoft computer work the same. Regardless if Mr Primeau bought this recorder, or just needed the skepamtics for it to identify "ANOMOLIES" whicha re in the audio portion of this evidnece.

I am sending you a copy of my last leeter from him, and what he said, which forced the release of these data from the sheriff department. It is so fucking painstakingly slow that it is almost baptismal, the pressures of not knowing, how to find out, or whether there is help.

Tba Tah Thank god they feed me here, lest I would have pas parished long ago awaiting help:0) Funny huh? Anyhow sir, take a few moment and see what type of batteles I am having with CDCR and wherh whther or not I am staying busy.

Love alaways

John Henry
